Edit Plan

Total Artifacts: 3

Detected Issues:

- [Fine representation le] garbled formula text at bottom
- [Fine representation le] garbled left input label
- [Fine representation le] garbled right input label

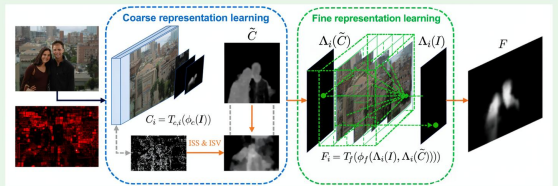

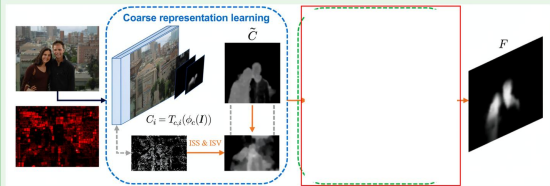

Edit Plan:

-> Redraw: "Fine representation learning" (3 errors)

Edit 0: Redraw "Fine representation learning" IMPROVED

Prompt:

Fill in the masked area in the middle-right of the image. Continue the green dashed rounded panel titled 'Fine representation learning' on the white background, with a white interior panel feel and compact layout. Inside, draw the left black saliency slice with clean math label ' $\Delta_i(\tilde{C})$ ' above-left, the central photo slice with clean label ' $\Delta_i(I)$ ' near the right side, the green wireframe rectangular box with green dashed guide lines converging to a green dot, and the right black output slice labeled 'F'. Add the black serif formula centered below: ' $F_i = T_f(\phi_f(\Delta_i(I), \Delta_i(\tilde{C})))$ '. Include the orange solid arrow entering from the left and the orange solid arrow exiting to the right. Match the surrounding style with a thin green dashed rounded border, green title text, black slices, a full-color central photo slice, and bright green wireframe edges and dashed guides. The left orange solid arrow comes from the coarse-learning panel on the left and points horizontally into this fine-learning region toward the left black saliency slice and wireframe block; the right orange solid arrow starts the right side of this region near the black output slice labeled 'F' and points horizontally to the final black output image panel outside the box. Keep all text horizontal, very small text, and organized dense internal spacing. Add more structure: three slightly staggered vertical slices across the wireframe volume, with the left black saliency slice in front-left, the color photo slice centered inside the green wireframe prism, and the right black output slice at front-right; the green dashed guide lines run diagonally and horizontally across the prism toward a small green central dot.

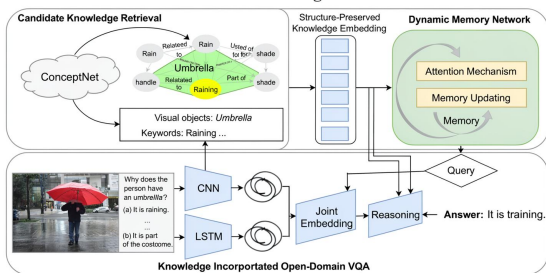

C/A/T After Edit:

Component: 0.30 -> 0.55 (+0.25)

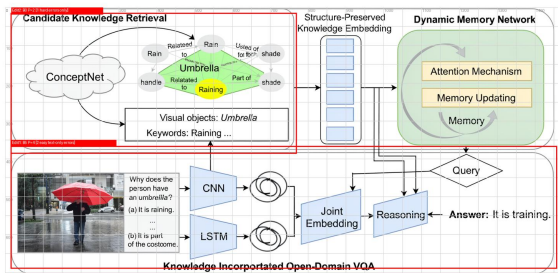

Arrow: 0.00 -> 0.42 (+0.42)

Text: 0.73 -> 0.73 (0.00)

Analysis

Total Artifacts: 3

Detected Issues:

- [Candidate Knowledge Rc] garbled tiny edge labels inside knowledge graph
- [Knowledge Incorporated] Misspelled answer text
- [Knowledge Incorporated] Misspelled option text

Edit Plan:

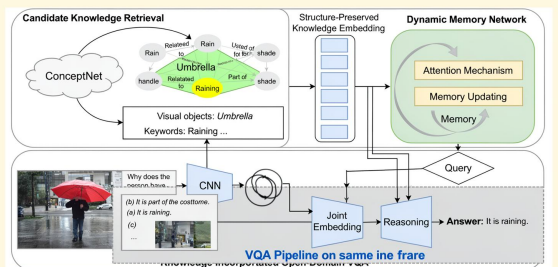

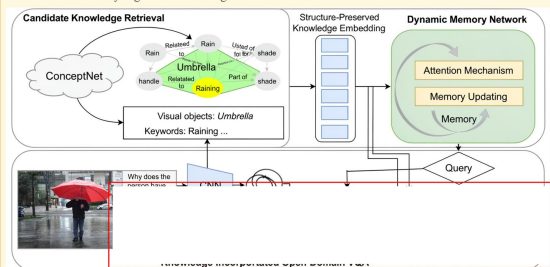

-> Redraw: "Candidate Knowledge Retrieval" (1 errors)

-> Text Edit: "Knowledge Incorporated Open-Domain VQA"

Edit 0: Text Edit "Knowledge Incorporated Open-Domain VQA" REVERTED

Prompt:

Fill in the masked area in the bottom-center of the image. Continue the light gray rounded panel with thin dashed gray border and blue footer title. Inside, complete the lower VQA pipeline on the same light gray background: at left, the multiple-choice text block with '(b) It is part of the costume.' in black serif font beneath '(a) It is raining.' and above '(c) ...'; below it a small rectangular photo. Center-left, a light blue trapezoid node labeled 'CNN' and above-left the preserved LSTM loop edge; and black solid arrows from the text/LSTM side and CNN side into a light blue trapezoid node 'Joint Embedding', then a black solid arrow to a light blue trapezoid node 'Reasoning', then a black solid arrow to the final answer text at right: bold 'Answer: It is raining.'

C/A/T After Edit:

Component: 0.90 -> 0.78 (-0.12)

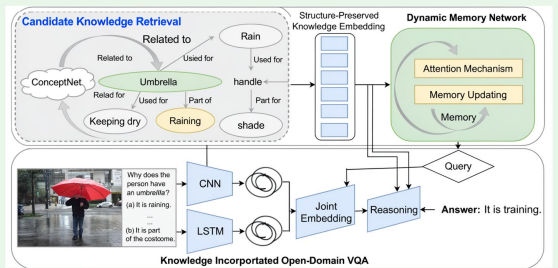

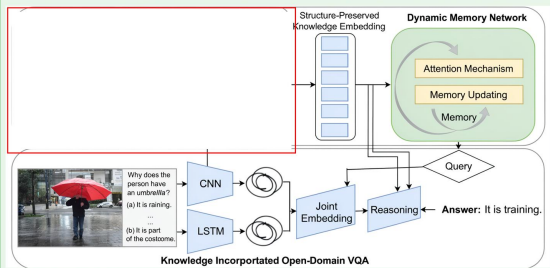

Arrow: 0.82 -> 0.68 (-0.14)

Text: 1.00 -> 0.82 (-0.18)

Edit 1: Redraw "Candidate Knowledge Retrieval" IMPROVED

Prompt:

Fill in the masked area in the top-left of the image. Continue the light gray rounded panel with thin gray dashed border on a white panel background. Add the bold blue title 'Candidate Knowledge Retrieval' at upper left; a white cloud node 'ConceptNet' on the left; a pale green central oval node 'Umbrella', yellow oval node 'Raining', and light gray oval nodes 'Rain', 'Keeping dry', 'handle', and 'shade'. Use thin gray connector lines with readable edge labels 'Related to', 'Used for', and 'Part of' placed between the corresponding links around the graph; specifically, a thin gray vertical link from 'Rain' down to 'Raining' labeled 'Related to', a thin gray diagonal link from 'Rain' to 'Umbrella' labeled 'Related to', a thin gray vertical link from 'Umbrella' down to 'handle' labeled 'Part of', a thin gray diagonal link from 'Umbrella' down-left to 'shade' labeled 'Related to', and a thin gray diagonal link from 'Umbrella' down-left to 'Raining' labeled 'Related to'. Add a thick light-gray curved arrow from 'ConceptNet' toward the graph, ending at the left side of the node cluster, and a thick light-gray left-pointing arrow from the lower 'Visual objects: Umbrella' and 'Keywords: Raining ...' box toward the left edge of the panel. Add the lower white rectangular text box with thin gray outline containing 'Visual objects: Umbrella' and 'Keywords: Raining ...'. Keep all text horizontal with very small text and compact layout; make the graph dense and organized, with clear spacing and readable tiny edge labels.
