Example 1:

Editing Prompt:

Fill in the middle-right masked area, continuing the green dashed rounded panel titled 'Fine representation learning' on a white background with a clean, compact internal layout. Inside, create a bright green rectangular prism with green dashed lines converging to a central green dot. Arrange three staggered vertical slices: a black saliency slice (labeled $\Lambda_{\text{C}}(\hat{C})$ above-left) at the front-left, a full-color photo slice (labeled $\Lambda_{\text{I}}(\hat{I})$ near the right side) centered, and a black output slice (labeled $\hat{F}$) at the front-right. Add an orange arrow entering horizontally from the left toward the saliency slice, and another orange arrow exiting horizontally from the output slice to the right. Centered below, include the small black serif formula: $\hat{F} = T_f(\varphi_{\text{f}}(\Lambda_{\text{I}}(\hat{I}), \Lambda_{\text{C}}(\hat{C})))$.

Example 2:

Editing Prompt:

Fill in the top-left masked area, continuing the light gray rounded panel with a thin gray dashed border on a white background. Add the bold blue title 'Candidate Knowledge Retrieval' at the upper left. Include a white cloud node 'ConceptNet' on the left. Create a dense, organized graph containing a pale green central oval 'Umbrella', a yellow oval 'Rain', and light gray ovals 'Rain', 'Keeping dry', 'handle', and 'shade'. Connect these nodes with thin gray lines and readable tiny edge labels placed beside the corresponding links: a vertical link from 'Rain' down to 'Rain' ('Related to'), a diagonal link from 'Rain' to 'Umbrella' ('Related to'), a vertical link from 'Keeping dry' down to 'Umbrella' ('Used for'), a vertical link from 'Umbrella' down to 'handle' ('Part of'), a diagonal link from 'Umbrella' down-left to 'shade' ('Related to'), and a diagonal link from 'Umbrella' down-left to 'Rain' ('Related to'). Add a thick light-gray curved arrow from 'ConceptNet' to the left side of the graph, and a thick light-gray left-pointing arrow from the lower text box toward the panel's left edge. Include the lower white rectangular text box with a thin gray outline containing 'Visual objects: Umbrella' and 'Keywords: Raining...'. Keep all text horizontal and very small, with compact layout and clear spacing.

Example 3:

Editing Prompt:

Fill in the middle-right masked area, continuing the gray, blue-outlined rounded rectangle for 'MULTIMODAL TRUSTED CLASSIFIER' on a white background, matching the panel's style inside, create a very compact layout with three vertically stacked white rectangular boxes featuring blue borders. Label these boxes with small, centered black serif/math-style text: $W_R \cdot CLF_R$, $W_D \cdot CLF_D$, and $W_P \cdot CLF_P$. Ensure three black solid arrows enter each box horizontally from the left, connecting from the dark-blue W_R , W_D , and W_P boxes outside. Add green solid arrows rising vertically from below into the bottom of each white box. From the right side of each box, draw white solid connector arrows to the light-blue circular summation node (marked with a white plus sign) at the right. The top arrow connects right and down, the middle arrow goes directly right, and the bottom arrow connects right and up into the summation node. Ensure the gray panel fill remains consistent.
